## "DUDLEY" NOSED DOG **ABSOLUTELY BARRED**

Bulldog Club of America So Determines by Unanimous Vote of Members.

SUSTAIN THE OLD IDEALS

New Ruling Disqualifies All Dogs So Marked—Cannot Win Any Prizes.

At a largely attended meeting of the Bulldog Club of America last week it was decided unanimously that the "dudley," pink, flesh, chocolate or light coffee color nosed buildog shall be disqualified under A. B. D. C. rules from winning a under A. B. D. C. rules from winning a will be held by well known Philadelphia prize of any sort; further, that a wholly owners and others, and in turn sent to black nose is the ideal, but a parti-colored participate in the handleaps in New Eng-

in no way shall disqualify.

It was pointed out by Robert Lobban and other breeders of much experience that in litters of pupples where there is much white, one or all will be found to have white splashes inside of the nostril nostrils, and this mark often remains.
All pupples are born with white or pink colored noses; there are little pin pricks of black on some of them, and it will gen-ones will be the earliest to reach the black nosed state. In the case of pupples having much white it will be observed to arrive shortly at her home having much white it will be observed to arrive shortly at her home having much white it will be observed to arrive shortly at her home having much white it will be observed to arrive shortly at her home going the rounds of the principal shows that the white speck or splash inside the colored nose, however, will doubtlessly be taken into consideration by the judge but, as before written, the "dudley" nose dog will be barred from taking any prize at shows held under the auspices of the Bulldog Club of America.

The presence of some white in or on th The presence of some white in or of the nose is more or less characteristic of the parti-colored dog, especially where white predominates. This white fiesh will also be found associated with dogs that have light blue or glaucous shaded coats. The wall or china eye often makes its appear-ence in the instance stated, as may be observed in Great Danes. Old English Dalmatians, rough collies Partially black noses are not suc' eyesore as the "dudley" is, and the est of it is that if a "dudley" nosed dog is bred the mesalliance is apt to show

Before the New Bulldog Club (England) was formed in 1875 the breed was in low water. Only a man of known position would risk being seen with a bulldog. A bulldog owner had to be a fighting man himself. The club formed in 1875 brought about a different state of things and as is well known, the bulldogs, English and French, are among the most popular and widely known and most popular and widely known and owned of all dogs. selected as a fashionable companion or the guardian of the house or both.

When the club was formed it was distinctly agreed that the color of the dog's nose must be black and in the scale of points the 1875 rule reads: "The nose should be large, broad and black.

—a paste or flesh colored nose (technically called 'Dudley') being in the opinion of many good judges an absolute disqualification in competition. When the 1875 scale of points was drawn up out of the one hundred marks for the total individual points of the perfect dog live points were aflowed for the 'Face.' Shortness, breadth and wrinkles of face; breadth, bluntness, equareness and upward turn of muzzle; position, breadth, size and backward in-clination of top of nose; size, width, black-ness of and cleft between nostrils—5

points."

It is reasonable to suppose that a dog taulty in the above mentioned points would be more highly penalized by the would be more highly penalized by the judges of to-day. In the face of all these and other authorities as to the decided color the nose of the buildog should be it may be reasonably inquired why the "dudley" nosed dog was allowed to win in this country. It is for the reason that there are several people who have great in buildogs who believe that

matter of fact one of the very best shaped bulldogs in America to-day is a pronounced "dudley," and he was placed nose, eyes, lips or whatever hairs, oc-casioned by the different pigments, ap-peared on the dog's body. It was to take this matter into consideration that the yote, private and public, was called for at the meeting of the B. D. C. A.; and in consequence the old half hearted rule that declared the "dudley" nose was ob-jectionable was struck out and the ab-

WHIPPET RACING POSTPONED.

Non-Arrival of Dogs From Abroad Is Cause of Change in Plans.

The whippet dog racing advertised to take piace on September 25 and 26 at Bryn Mawr, Pa., has been postponed in consequence of the non-arrival of about thirty new dogs that were to come to Philadelphia last week from England. In consequence of the upset of matters generally on the other side and the non-arrival of Big Annual Event for Money Prizes. delivery or delay of certain cables, a hitch occurred in reference to the whippet ex-portation in England, and, there not apparently being enough dogs forwarded to take part in a representative meeting of he kind it was wished to start with the Philadelphia suburb, it was decided on Wednesday last to postpone the event.

The new club, which will consist of several prominent men and women fond of outdoor aport and who are connected with

some of the best known country club-in Pennsylvania, desires that the sporshould start on a basis that shall decide the future popularity of the sport. To three runners in each heat would be only half hearted, since a good deal of the spectacle of the pastime comes from the number of runners in each race of the handicap. The importation of whippers will proceed regularly now, and these dogs or a blue nose is undesirable, but that it land and wherever there may be dog in no way shall disqualify. Philadelphia club will be announced.

So great, it is eald, was the objection to the non-cropping of dogs' ears pro-posal at the meeting of the delegates to the American Kennel Club last week said that the amendment to the rules was receiving any consideration at the meet-ing as then constituted. That it was more a matter for the specialty clubs, others remarked; and the Bull Terrier Club, the Great Dane Club and the dif-ferent Boston Terrier clubs knew what was best for the breeds in which each one

was best for the breeds in which each one was most concerned. Still another said that the Boston Terrier people had made the Boston terrier what he is through the cropping of the dogs' ears.

So cropping will be allowed to go on so far as the A. K. C. delegates are concerned. The continued operation of cutting the cartilage of dogs' ears in America will disqualify them in competition at will disqualify them in competition at shows in England; but since the quaran-tine of three months and in some cases six months is retained on the other side it is not expected that any exportation of Boston terriers from America to the British Isles for the purposes of bench shows would have taken place, or at any rate not to an appreciable extent.
